

Capitalflow is on the lookout

**FOR A NEW**  
**QA Tester (Fintech Platforms)**  
to join our growing team

People working together to make a difference is what Capitalflow is all about – we work hard to support each other and to support our customers through thick and thin

This is what makes us a business lender like no other  
Put simply, we are all about people, building relationships, and going the distance together.

**Do you want to join us on our quest to  
transform business lending by putting people  
first in everything we do?**

Continuing our exciting growth journey, Capitalflow has invested heavily in digitalising the business over the last year and is looking for a QA Tester to join our Digital Team.

The candidate ideally has experience in testing customer facing digital journeys perhaps in a financial services environment. Working remotely and from Dublin you will be part of a collaborative team from different backgrounds who has a passion for building successful robust products and systems.

**As a part of our agile team, you will be looking after  
the testing side of our products**

**IF YOU ENJOY A FAST ENVIRONMENT, EXCEL IN BUILDING RELATIONSHIPS BOTH  
INTERNAL AND EXTERNAL, THRIVE IN A TEAM ENVIRONMENT AND YOU HAVE  
STRONG ATTENTION TO DETAIL WE WOULD LOVE TO HEAR FROM YOU!**

## WHAT YOU'LL BE DOING ...

- Maintaining and improving a well-designed QA process which is aligned with QA best practices.
- Partaking in the full development cycle (spring planning, daily scrums, retrospectives) all the way from development to release.
- Being responsible for the development of a Test Strategy that will ensure high test coverage and quality & ensuring that testing happens in a correct and timely manner to allow for fast and safe releases and making sure "No code goes untested".
- Working within a cross-function development team following agile software development methodologies, identifying product defects, logging them, verifying fixes, tracking progress, reporting results, forecasting areas of risk and providing mitigation plans.

## OTHER THINGS WE'D NEED FROM YOU...

- Develop a strong knowledge of the business
- Keep a strong eye on the detail
- Work as a team player to find solutions/make any improvements
- Keep true to our brand and values and always put people first!

## QUALIFICATIONS...

- A BSc or MSC in computer science engineering, or related field with at least 2 yrs experience
- Experience with Python, Behave (or similar) and Cumber, or other BDD Testing Frameworks
- Experience using Jira and Confluence, Selenium to test UIs, specifically single page applications
- Experience in manual and automated testing of web applications and REST APIs
- Have knowledge of CI.CD, ability to use Git, and containerisation technologies like Docker
